

NEW | Expanded volume range

AQUAstay – strength you can trust!

AQUAstay water tanks from 5.000 L to 70.000 L for rainwater, drinking water and wastewater!

Designed for larger infrastructure needs, with volumes up to 70,000 liters.

Systems of this capacity are commonly used in urban infrastructure, logistics centers and industrial facilities.

 **APLAST**

DIMENSIONS

Water containment:

AQUAstay water tanks are the perfect solution to ensuring an even flow of rainwater into the ground.

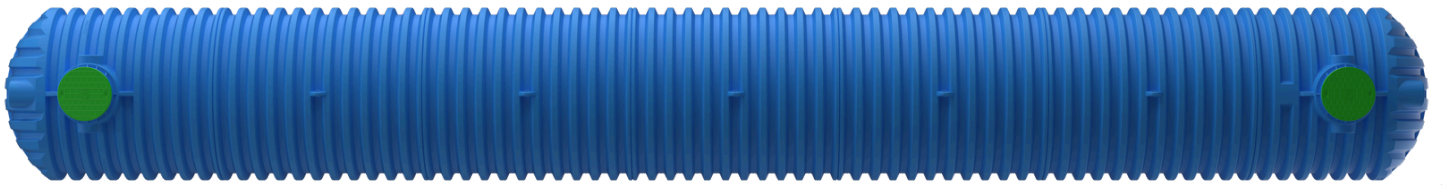

Fire water systems:

With a pre assembled system for water collection and appropriate connections for firefighting equipment, the AQUAstay tanks can also be used for fire safety purposes.

PROPERTIES

Rotomoulded out of high quality polyethylene. The tanks can be connected into larger collection systems in various ways.

Maximum volume: 70,000 L, suitable for large-scale storage and system integration.

ADVANTAGES

- Fewer units in the system
- Lower maintenance costs
- More stable system performance
- Better space utilization

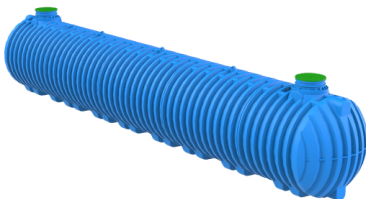

CONNECTIONS

There are several available connection points on the tanks (for PE pipes as well as inlet gaskets).

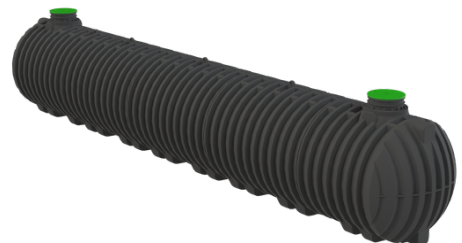

USE

FOR RAIN WATER

FOR DRINKING WATER

FOR WASTE WATER
