About us

Among the **TOP 101 medium-sized companies** in Slovenia.

Sales 2025:
13.8 mio €

Number of
employees: **120**

Markets:
32 countries

APLAST d.o.o. is a manufacturer specializing in the production of a wide range of rotomoulding products. With more than **120 employees**, we follow the principles of technological innovation, building our own brand and enjoying a high reputation in both domestic and international markets. For this purpose, we use the most advanced rotational moulding technology, which has the least impact on the environment and preserves the future of our environment.

High quality production

Our main focus is the underground infrastructure with sewage and water supply systems. We offer efficient and environmentally friendly products for the collection and treatment of wastewater, collection systems for drinking and technological water, as well as systems for underground collection and separation of waste and elements for pipe floaters. We also provide solutions for the automotive industry.

Customer satisfaction

More than 50 % of revenues are generated by export to **32 countries worldwide**. The share of export has almost doubled in recent years. We owe the outstanding loyalty of our customers to the focus on development of high-quality products that meet the requirements of quality, safety and efficiency, the excellent relationship between the quality and price, flexibility as well as to our special approach we take when working with our business partners. We thus ensure the market advantage and recognisability of our own trademark products in an increasingly competitive global market.

In-house development and development partnership

Our products are the result of our in-house development department that combines all the necessary expertise, from design and construction, all the way to product implementation. At the same time, we are a reliable partner who, together with the customer, develops the tools and takes care of the production of the desired product. We are certified according to the standards of **ISO 9001 quality management system and ISO 14001 environmental management system**.

The milestones

2002

Establishment of Aplast d.o.o.; start of the production of the first sewage shafts and water meter thermal shafts.

2006

Expansion of production capacities.

2011

Start of production of Aquastay.

2012

Start of production of Caravan program.

2013

Acquisition of the ECOdip brand; start of production of water treatment plants.

2020

Relocation of production to new location in Ložnica & increase of production capacities.

2022

Installation of a solar power plant (1 MW).

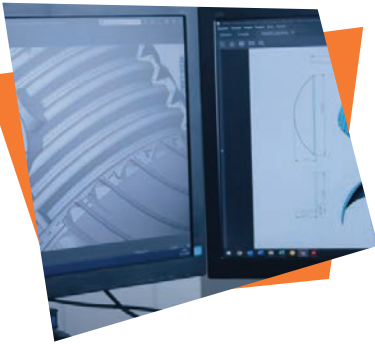

2025

Relocation to new commercial office space.

Main activities

Development and construction

Tool production

Production of PE products by rotomoulding process

Assembly workshop

Quality control

Production of PE products by rotomoulding and robomoulding process

Our mission

We develop high-quality rotomoulded products that contribute to preserving a healthy planet and pristine nature, thereby improving the quality of our daily lives. We specialize in production, design, and development, striving every day to achieve the highest quality standards while reducing pollution and following sustainable manufacturing principles.

Our vision

We strive to become a leading manufacturer of rotomoulded polymer solutions across a wide range of industries, continuously pursuing new opportunities and sharing our technology.

Product and services

The unique capabilities of the machines and their ability to transform materials enable the production of a variety of products. In this way, we can strive to **create integrative solutions** and meet the needs of various industrial sectors: construction (water supply, sewerage), underground waste collection, caravan program and the float segment.

Our products are made of **polyethylene (PE)**, a high-quality material, characterized by numerous, positive properties: low weight, flexibility, resistance to solvents and chemicals, high buoyancy and low water absorption.

Your partner in Industry

Aplast is a trusted development partner and supplier for various industrial sectors. In addition to our standard programme, we provide customers with **complete solutions** – from idea, design, tool preparation, in-house production to finished products.

Our **industrial programme** focuses on achieving the highest level of technical quality while ensuring the optimization of both investment and production costs. With many years of experience and modern technological know-how, we successfully implement projects according to individual customer requirements.

We are also a **reliable partner** in the production and finishing of products and semi-finished goods for leading and renowned European companies, who value our expertise, precision and flexibility.

**From idea
to perfect
product.**

Quality,
precision,
trust.
